**DECLARATION OF CHRISTOPHER
 THOMPSON IN SUPPORT OF
 PLAINTIFFS' OBJECTIONS TO THE
 SPECIAL MASTER'S RECOMMENDED
 PRESERVATION PLAN**

Referral: The Honorable Susan van Keulen

DECLARATION OF CHRISTOPHER THOMPSON

I, Christopher Thompson, declare as follows.

1. Counsel for the *Brown* Plaintiffs retained me to provide technical analysis and testimony in connection with the preservation plan recommended by Special Master Brush and objections thereto.

2. All of the statements in this declaration are true based on my analysis and personal knowledge, and I am available and if the Court permits it willing to testify on these matters.

3. A copy of my CV was previously filed at Dkt. 536-9. As reflected in my CV, I majored in Computer Engineering and have many years of experience in computing technology. I am being compensated at a rate of \$275 per hour for my work in connection with this matter, and none of my compensation is contingent on the outcome of this litigation.

4. In the course of my previous work writing software and building software systems, I have used Protocol Buffers, defined “proto” schema files, and built systems that write to the data structures defined by proto files.

5. I have reviewed each and every submission Google and the Special Master made available as part of the Special Master process, including the Plaintiffs’ data, test data, and schema produced by Google, and the transcripts of the hearings before the Special Master. In addition, all documents Google produced and deposition transcripts for witnesses in this case have been made available to me pursuant to the Protective Order issued in this case.

6. I understand that Google has argued that preserving all private browsing activity would require storing [REDACTED]

[REDACTED].

7. Based on my analysis of the data produced by Google in this litigation, including in connection with the Special Master process, that assertion is misleading. Google can greatly reduce its stated burdens by preserving only relevant data drawn from fewer logs.

8. Google identified [REDACTED]¹ logs during the Special Master process. Assuming that

¹ Google initially identified [REDACTED] logs (Dkt. 338) and then continued to identify additional logs throughout the process as new data came to light until the Special Master required the parties to present their

1 Google identified all logs in which it stores web browsing data, and assuming that each log requires
2 equal storage space, [REDACTED]

3 [REDACTED].
4 9. Google can reduce its burden further by preserving only [REDACTED]

5 [REDACTED]
6 [REDACTED]
7 [REDACTED]: Google Chrome's market share is approximately 50%, and
8 [REDACTED]. See Statcounter,
9 Browser Market Share United States of America (last accessed April 14, 2022),
10 [https://gs.statcounter.com/browser-market-share/all/united-states-of-america#monthly-201601-](https://gs.statcounter.com/browser-market-share/all/united-states-of-america#monthly-201601-202202)
11 [202202](https://gs.statcounter.com/browser-market-share/all/united-states-of-america#monthly-201601-202202); GOOG-CABR-04795991 at -996; GOOG-BRWN-00846508 at -508.

12 10. Taken together, those two limitations would likely reduce the storage space for
13 preservation of Incognito traffic by [REDACTED].

14 11. Google's burden could be further reduced by creating a new log containing only
15 the fields most important for class member identification.

16 12. Finally, my analysis does not account for Google's existing retention policies which
